Laser shows

Specialist Laser shows are exciting and dramatic

Our interactive multimedia performances utilise lighting, laser and video projection in combination with mirrored costuming, fabric and fibre optic technology.

Performance can be incorporated into laser graphic and video presentations, enhance reveals or simply provide exciting entertainment.

Although performed mostly solo, shows can range in size up to sixteen performers. Adding the human element to a presentation using technology is not only visually spectacular but also progressive, an image all clients would wish to project.

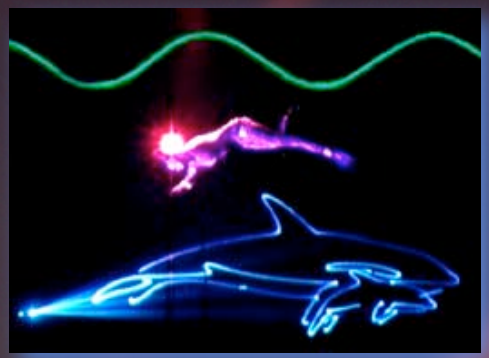
Costuming and choreography can be designed to suit the event and have been developed for many themes including futuristic, aquatic, enchanted forest, Ancient Egyptian, Thai, French and Japanese.

FABRIC DANCE
Enter a sublime world as a mysterious figure, immersed in floating fabric dances in a space filled with laser light. The effect on the fabric is like molten electricity and is both beautiful and mesmerising.

MIRROR LIGHT DANCE
Using high power intelligent lights the dancers create similar effects, often in conjunction with Laser Mirror Dance, especially for group events.

MIRROR LASER DANCE
The performer showers the audience with beautiful sprays of light reflected by her mirrored costume. Tightly choreographed with synchronised effects, this performance takes you into the 21st Century and beyond.

GROUP SHOW
When there is a large audience to entertain we provide multiple light dancers and often include an aerial performer.



AERIAL SHOW
Aerial show with aquatic theme incorporating laser graphics and utilising our 25 metre travelling rig.
Wave Whale

MULTIMEDIA
27 video cubes and prepared interactive video with light dance. Performer danced with a chorus line of 9 lifesize images of herself.
Video cube

FIBRE OPTIC SHOW
The performer wears a glowing fibre optic costume,emitting lasers from her fingers in a futuristic show.
